

# AESCULAP® Detachable Rongeurs

# Noir® Coated Detachable Rongeurs

## Cleanability

Ever increasing demands in the reprocessing of surgical instruments require professional and efficient processes, together with intelligent product solutions, which meet modern hygiene standards.

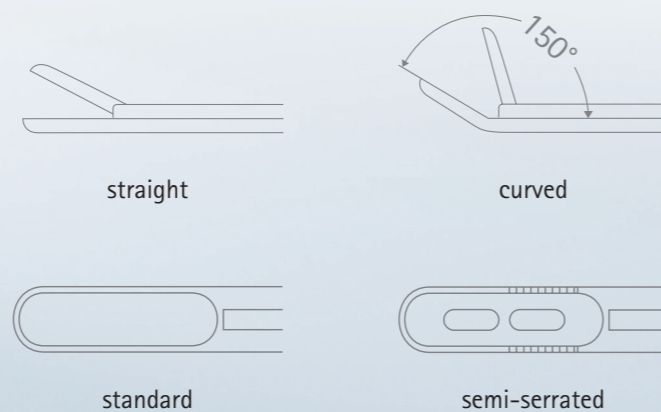

## Noir® coating

All models come with the proven Noir® coating for the reduction of distracting light reflections.<sup>1</sup>

## The choice is yours

86 models with working lengths from 150 mm to 280 mm, jaw widths from 1.5 mm to 5 mm, standard and semi-serrated jaws in straight and 150° upward curved.

<sup>1</sup> The gloss level of a Noir®-coated instrument was compared to the gloss level of an uncoated instrument by means of a glossmeter. The reflections (gloss levels were determined at 6 different measure points) were reduced by 60% (crosswise) and 80% (lengthwise) on average.

## Handling

The golden button indicates the detachability. In the open cleaning position all parts remain connected.

## Identification

- Working length
- Jaw width

## Disassembly steps

- 1 Push the golden button
- 2 Pull down the front handle
- 3 Lift the slider

# Instrument Organisation System

## AESCULAP® Instrument Organisation System

Surgical instruments are valuable assets for every hospital, which is why they should be processed as efficiently and gently as possible.

Therefore, protecting the instruments during sterilisation, as well as in transport to sterile supply stores and to the operating room, is of crucial importance.

The new Aesculap organisation system for instrument trays facilitates the storage especially of delicate instruments and small items.

The main product trademark "AESCULAP" and the product trademark "Noir" are registered trademarks of Aesculap AG.
